My name is Luiz Guilherme, I'm 23 years old, and I'm from Brazil.

Since I was a kid, I've always been passionate about technology, which is why I decided to pursue a career in software development. I currently work as a software developer at LogLab, focusing specifically on the frontend, using technologies such as Next.JS, TypeScript, Docker and Node.js. As someone who is fascinated by software development, I am very interested in learning and improving my skills in new technologies.

Technology is my way of changing the world, and that's why I love what I do!

Professional Experience

LogLab Inc.   March 2023 - Present
Software Developer

LogLab is a private company that develops software products for public bodies.

I helped develop several projects for the government of the state of Mato Grosso as

- School re-enrollment service for students from the public education department (SEDUC-MT);
- Management service for the activities of public servants;
- Feedback service from public bodies;
- Amateur fisherman license registration service.

I worked mainly as a frontend developer using technologies such as Javascript and Docker, developing projects from scratch and helping to resolve bugs in projects.

Education

Bachelor in Internet Systems January 2023 - June 2025
Unopar

- Algorithms and Data Structure
- Computer Architecture and Organization
- Data Modeling
- Logic and Computational Mathematics
- Systems Analysis and Modeling
- Interface and Usability
- Object Oriented Analysis

Key Skills

- **Javascript**
- **React**
- **React Native**
- **Agile/Scrum**
- **Always learning**

Volunteering

FreeHelper   December 2023

FreeHelper is an NGO that connects people who want to help with causes that need support. I'm currently on the developers team of an action for a school in the interior of the state of Goiás (Brazil) that uses social entrepreneurship to raise funds to maintain the school's activities. We are developing a sales platform that integrates with WhatsApp.
